Trim & Roofline Planner

FREE PRINTABLE HOMEOWNER GUIDE

This worksheet helps organize your interior trim, door, soffit and fascia request. Estimate from safe, accessible areas only; a professional can confirm field measurements.

Interior trim and doors

- [ ] List each room and the trim requested: baseboard, quarter round or crown molding.
- [ ] Note the current trim material and finish, and whether removal is needed.
- [ ] Count interior doors and note slab versus prehung when known.
- [ ] Record any sticking doors, uneven floors or wall gaps to discuss before installation.

Soffit and fascia observations

- [ ] From the ground, identify the roofline side and visible damaged sections.
- [ ] Note existing soffit style, apparent color and whether vents are present.
- [ ] Note the apparent fascia material and any bent, detached or stained covering.

Do not climb or touch damaged roofline materials. If water is actively entering, prioritize a qualified inspection.

Ask before approving work

- [ ] Are removal, disposal, caulking, filling, painting and touch-ups included?
- [ ] For doors, are hardware, jamb adjustment and casing included?
- [ ] For soffit and fascia, how will the underlying substrate and ventilation be handled?
- [ ] Will any work outside the agreed nonstructural scope require a separate quote?

Request a free quote at The Siding Man or call 1-800-4-HARDIE. Project scope and availability are confirmed after review.
